CSR reporting: communicating your CSR results and actions

DD-27 1 Days (7 Hours)

Description

Writing a CSR report, beyond the legal reporting obligation for companies with more than 500 employees, allows you to promote your good practices in terms of sustainable development. By communicating about your already existing practices, your actual progress, your objectives, you demonstrate to your interested parties your formal CSR commitments. This day gives you the keys to building a relevant CSR report by working on the substance and form of communication.

Who is this training for ?

For whom

SME director. Communication manager. CSR, Sustainable Development Manager.

Prerequisites

None.

Training objectives

- Understand the notions of mandatory and voluntary reporting such as the CSR report.
- Identify the key data to be collected in the areas of CSR reporting (social, societal, environmental, economic).
- Identify the formatting rules. /p>

Programme:

- En amont du présentiel
- Comprendre la logique du rapport/reporting RSE
- Recenser les enjeux clés d'un reporting
- Élaborer des textes clairs et percutants

Sustainable Development Manager - CSR (Corporate Social Responsibility)

DD-27 8 Days (48 Hours)

Description

Today, responsible management chooses to commit their companies to the path of sustainable development by identifying and assuming their social responsibility. Their challenge is then to reconcile economic performance, respect for the environment and social responsibility. Driving, guiding and coordinating all of the societal actions to be carried out then becomes the mission of Sustainable Development Managers. This cycle is dedicated to them. In this training, they will find the tools and methods to carry out their projects. The first part ensures understanding of the issues and concepts of CSR, the second module focuses on the diagnosis and formalization of a CSR action plan involving the entire company. Finally, part 3 is devoted to communication and promotion of the CSR approach.

Who is this training for ?

For whom

Director, responsible for Sustainable Development. Project manager or Sustainable Development or CSR (Corporate Social Responsibility) project manager. Director, manager wishing to get involved in Sustainable Development.

Prerequisites

None.

Training objectives

- Take charge of your mission as Sustainable Development-CSR manager.
- Understand the issues and principles of Corporate Social Responsibility (CSR).
- Acquire the theoretical bases and appropriate the tools to lead a Sustainable Development approach- CSR in your company.
- Integrate the project management and change management dimensions.

Programme:

- PARTIE 1 : Les fondamentaux de la RSE (3 jours)
- PARTIE 2 : Construire un projet RSE à travers un cas "fil rouge" (3 jours)
- PARTIE 3 : Accompagner, suivre, valoriser la démarche RSE (2 jours)

Sustainable Development and purchasing: practicing responsible purchasing

DD-29 2 Days (14 Hours)

Description

According to a recent study, 64% of companies present their Sustainable Purchasing approach as a priority objective of their CSR policy. At the same time, maintaining the best value for money remains a priority. So, how can we reconcile these objectives which may seem antagonistic? Representing a significant portion of company turnover, purchases constitute significant leverage towards more virtuous modes of production and consumption. Implementing sustainable purchasing is based on a certain level of ethics, contributes to the total quality of purchases and contributes to the overall performance of companies. These two days of purchasing training will allow you to identify concrete ways to reduce your risks, reduce your costs and create value: search for more energy-efficient resources, find eco-responsible products, select a supplier in line with your commitments in favor of sustainable development... so many points of support for building a sustainable and inclusive purchasing approach.

Who is this training for ?

For whom

Buyer, project manager, having to make responsible purchases. Purchasing manager or director deploying a sustainable purchasing policy. Sustainable Development Manager or Director. Business leader eager to discover the operational contribution of his purchasing function.

Prerequisites

None.

Training objectives

- Identify the essential determinants for implementing a responsible purchasing strategy
- Acquire efficient behaviors and business practices throughout the purchasing process
- Become autonomous and systematize this operational approach to any family of products or services

Programme:

- Définir l'achat responsable Le Développement
- Déterminer ses engagements en matière d'achats responsables Cartographier ses risques RSE.
- Qualifier un besoin

- élaborer le cahier des charges Identifier les risques et les impacts potentiels.
- évaluer et sélectionner les fournisseurs Pourquoi et comment évaluer ses fournisseurs.
- Sécuriser la relation contractuelle Les conditions d'exécution.

- Examen de certification

ISO 14001 Lead Implementer “environmental management”

DD-27 5 Days (35 Hours)

Description

The ISO 14001 Lead Implementer training will allow you to acquire the expertise necessary to support an organization during the establishment, implementation, management and maintenance of an Environmental Management System (EMS) compliant with the ISO 14001 standard. This training is designed to provide you with a mastery of best practices in environmental management systems and to develop your abilities to reduce the negative environmental impacts of the organization, improve its efficiency and its overall performance.

Who is this training for ?

For whom

- Managers or consultants involved in environmental management
- Specialized advisors wishing to master the implementation of an environmental management system
- Any person responsible for maintaining compliance with EMS requirements
- Members of an EMS team

Prerequisites

Good knowledge of the ISO 14001 standard and in-depth knowledge of the principles of its implementation.

Training objectives

- Understand the correlation between ISO 14001 and ISO 14040, as well as other standards and regulatory frameworks
- Master the concepts, approaches, methods and techniques necessary to effectively implement and manage an EMS
- Know interpret the requirements of the ISO 14001 standard in a specific context of the organization
- Know how to support an organization in the planning, implementation, management, monitoring and updating of the EMS
- Acquire the necessary expertise to advise an organization for the implementation of best practices relating to the Environmental Management System

Programme:

- Introduction au concept du Système de Management Environnemental ISO 14001
- Initialisation d'un projet de SME ISO 14001
- Mettre en place un SME ISO 14001
- Contrôler, surveiller, mesurer, améliorer un SME
- Examen de certification

Green Data Center, optimize your energy performance

DD-17 2 Days (14 Hours)

Description

At the end of this training, you will be able to identify the key areas for reducing the electricity consumption of a data center and will be able to implement improvement solutions. This training is part of the PrimeEnergyIT project of the European Commission.

Who is this training for ?

For whom

DSI, Data Centers manager, project manager.

Prerequisites

Aucune

Training objectives

- Optimize different Green IT projects Carry out an inventory of energy and environmental performance Choose the IT solutions appropriate to your needs Select the right infrastructure solutions

Programme:

- Comprendre les enjeux du Green IT
- Appréhender les problématiques clés des centres informatiques
- Maîtriser le contexte réglementaire
- Mesurer pour identifier les domaines de progrès
- Les solutions IT
- Les solutions liées à l'infrastructure
- Retours d'expérience

Apprentissage d'ArcGIS for Desktop

DD-27 3 Days (21 Hours)

Description

Get started with the main tools and features of ArcGIS for Desktop.

Who is this training for ?

For whom

Professionals, employees, job seekers, students.

Prerequisites

Be familiar with GIS concepts. or have followed the "S.I.G. Theory" training. "

Training objectives

- Give beginners basic training on the ArcGIS for Desktop suite of tools
- Allow "self-taught" users to consolidate their knowledge and have answers to their various questions
- Be operational on ArcGIS for Desktop to perform basic GIS operations

Programme:

- 1^{er} jour
- 2^{ème} jour
- 3^{ème} jour

Advanced use of graph data Documents, geocoding, GPS, layer crossings, ...

DD-21 2 Days (14 Hours)

Description

Mastery of issues related to documents and geocoding, Being able to create new data from several layers.

Who is this training for ?

For whom

GIS engineers and technicians. required to use the advanced functions of the S.I.G. software.

Prerequisites

Aucune

Training objectives

- -Allow people using MapInfo to improve their knowledge and have answers to their various questions
- - Learn about the wide range of MapInfo features; - Answer questions that users may ask in their use daily use of the software

Programme:

MapInfo improvement: advanced use of graphic data

DD-27 2 Days (14 Hours)

Description

Advanced scanning, geocoding and GPS data integration features

Who is this training for ?

For whom

All audiences.

Prerequisites

Minimum computer skills are essential.

Training objectives

- Understand what a geographic information system (GIS) is,
- Design a presentation of data on a map
- Perform geographic operations,
- Manipulate information from databases,
- Disseminate maps and data ,
- Advanced selection of data using SQL,
- Connect to external databases (MS Access),
- Automate some repetitive tasks (thematic analysis, layout, etc.),
- Disseminate maps and data.

Programme:

- Concepts de base d'un SIG
- Les systèmes de coordonnées
- Présentation du logiciel et des données
- Manipulations de base
- Les références spatiales

- Créer de nouvelles tables MapInfo
- Importer/Exporter des données
- Jointure

Environmental databases Environmental databases and links to GIS

DD-25 2 Days (14 Hours)

Description

Locate environmental data and know the conditions and limits of their use. Know how to use and integrate environmental information into your GIS.

Who is this training for ?

For whom

Employees responsible for environmental issues, Students and job seekers called upon to use environmental databases.

Prerequisites

None.

Training objectives

- Know where environmental data is stored and how to repatriate it into your GIS
- Master connections to environmental databases to integrate information into a GIS
- Be operational to deal with environmental issues
- *

Programme:

- 1er JOUR / Théorie
- 2eme JOUR / Pratique

Setting up a PostgreSQL database linked to GIS

DD-26 5 Days (35 Hours)

Description

Conceptualization, Creation, management and exploitation of a PostgreSQL database, Creation of direct or indirect links with GIS software,

Who is this training for ?

For whom

Prerequisites

Aucune

Training objectives

- Set up a database on PostgreSQL and link it with GIS software

Programme:

Setting up a Postgis spatial database

DD-25 5 Days (35 Hours)

Description

Install, create and operate a Postgis spatial database

Who is this training for ?

For whom

Be familiar with the Windows environment and database management systems or have followed database training offered by IDGEO.

Prerequisites

GIS engineers and technicians, database administrators

Training objectives

- Store and manipulate spatial data in a free and efficient database management system Manipulate the SQL query language in its spatial dimension

Programme:

- Les bases de données spatiales
- PostGIS
- Importation de données dans PostGIS
- Liens PostGIS et logiciels SIG
- Lien MAPINFO/PostGIS et liens ArcGIS/PostGIS
- Créer des objets par requêtes : Analyses spatiales
- Remplir une colonne géométrique avec des coordonnées x,y
- La gestion des projections dans PostGIS
- Le stockage et la manipulation des images raster dans PostGIS

ISO 50001 Lead Auditor “Energy Management”

DD-27 5 Days (35 Hours)

Description

ISO 50001 Master Audit training will enable you to develop the essential skills to carry out Energy Management System (AMS) audits using generally accepted auditing principles, procedures and techniques.

During this training, you will learn how to plan and conduct internal and external audits in accordance with ISO 19011 and the ISO/IEC 17021-1 certification process, as well as effective auditing techniques.

Through practical exercises, you will learn how to manage audit programs, audit teams, client communication and conflict resolution. After gaining this expertise, you will be able to take the exam and earn the title of **“PCEB Certified ISO 50001 Lead Auditor”**. This certificate will demonstrate that you have the skills necessary to audit organizations in accordance with auditing best practices.

Who is this training for ?

For whom

All audiences

Prerequisites

Good knowledge of the ISO 50001 standard and in-depth knowledge of auditing principles.

Training objectives

- Understand the operation of an Energy Management System (EMS) compliant with the ISO 50001 standard
- Analyze the correlation between the ISO 50001 standard and other standards and regulatory frameworks
- Be able to supervise a audit and an audit team
- Understand the role of an auditor: planning, leading and monitoring a management system audit in accordance with ISO 19011
- Be able to lead an audit and an audit team
- audit
- Interpret the requirements of ISO 50001 in the context of an EnMS audit

- Develop the skills of an auditor to plan, direct, write reports and follow up on an audit, respecting the requirements of the ISO 19011 standard

Programme:

- Jour 1 : Découverte du Système de management de l'énergie et de la norme ISO 50001
- Jour 2 : Principes, préparation et lancement d'un audit
- Jour 3 : Audit sur site
- Jour 4 : Clôture de l'audit
- Jour 5 : Examen de certification

ISO 50001 Lead Implementer "Energy management"

DD-27 5 Days (35 Hours)

Description

This training will allow you to acquire in-depth expertise in best practices in Energy Management Systems (EMS), as well as develop your skills to reduce energy costs, improve energy performance and promote development sustainability of an organization.

Who is this training for ?

For whom

- Managers or consultants involved in energy management.
- Specialized advisors wishing to master the implementation of an Energy Management System.
- Any person responsible for maintaining compliance with the requirements of the EnMS.
Members of an EMS team.

Prerequisites

Good knowledge of the ISO 50001 standard and in-depth knowledge of implementation principles.

Training objectives

- Understand the relationship between ISO 50001 and other relevant standards and regulatory frameworks
- Acquire the knowledge, approaches, methods and techniques necessary to effectively establish and manage an energy management system (EMS)
- Be able to interpret the requirements of the ISO 50001 standard in the specific context of the organization
- Be able to support an organization in planning, implementing, managing, monitoring and updating its EMS
- Develop the expertise necessary to advise an organization on the application of best practices relating to the energy management system
