

Practical guide to ISO 45001

QST-18 3 Days (21 Hours)

Description

The ISO 45001 standard (International Standard Organizations) is the new international reference text which specifies the requirements for a health and safety management system as well as the guidelines for their use. It thus helps to develop and implement a prevention and continuous improvement approach aimed at reducing and/or eliminating professional risks and providing employees with safe working conditions. Discover in this new training how to concretely meet the requirements of this new ISO 45001 standard with a view to certification or not.

Who is this training for ?

For whom

Director, Manager, Health and Safety Facilitator. Team manager. Safety representative. ISO 45001 certification project manager.
