

Preparing for PMP® V7 certification

MPGP-94 5 Days (36 Hours)

Description

The PMP ® certification must be passed with the PMI (Project Management Institute).

Why PMP ® certification preparation training? Project management plays a major role in business management practices. Despite the apparent ease of the theory, practicing project managers realize the difficulty of the art. A project manager only achieves effectiveness in all circumstances after a few years of experience.

To validate the relevance of the experience acquired, project management associations have defined people certification systems. These devices are only accessible to professionals who can demonstrate a minimum duration of experience.

The PMI ® (Project Management Institute) has defined a certification called PMP ® (Project Management Professional) which has achieved real success. More than 523,000 professionals (May 2013) hold PMP ® certification worldwide.

We remind candidates who subsequently wish to register for the exam that they must meet the qualification and experience requirements defined by the PMI ® . These requirements can be consulted online on the: PMI ® website. PMI, PMBOK, PMP, PgMP, PMI-SP, PMI-RMP and the PMI Registered Education Provider logo are registered trademarks of the Project Management Institute, Inc.
