

ISO 45001 Foundation “Health and safety at work”

QST-82 2 Days (14 Hours)

Description

The ISO 45001 standard is the first international standard relating to occupational health and safety management systems which replaces the OHSAS 18001 standard. The ISO 45001 Foundation training will allow you to understand the fundamental elements to implement and manage an Occupational Health and Safety Management System (OHSMS) in accordance with the ISO 45001 standard. During this training, you will learn the different modules of an Occupational Health and Safety Management System (OHSMS), including the OHSMS policy, procedures, performance measurement, management commitment, internal audit, management review and continuous improvement. After completing the training, you can take the exam and apply for the “PECB Certified ISO 45001 Foundation” title. The PECB Foundation certification certifies that you have understood the fundamental methods, requirements, framework and management approach.
