

ISO 45001 Transition “Health and safety at work”

QST-81 5 Days (35 Hours)

Description

The ISO 45001 transition course will allow you to better understand the differences between OHSAS 18001 and ISO 45001. During this training, you will be able to develop the knowledge and expertise necessary to support an organization in planning and implementing implementation of the transition process from a current OHSAS 18001 management system to ISO 45001 in a timely manner. After having mastered the new concepts and requirements of the ISO 45001 standard, you can take the exam to obtain the “PECB Certified ISO 45001 Transition” certification. The PECB certificate certifies that you have the practical knowledge and professional abilities necessary to successfully apply ISO 45001 changes to your existing management system.

Who is this training for ?
