

## ISO 45001 Lead Implementer “Health and safety at work”

QST-85 5 Days (35 Hours)

### Description

The ISO 45001 standard is the first international standard that deals with Occupational Health and Safety Management Systems. It replaced the OHSAS 18001 standard.

The ISO 45001 Lead Implementer training will allow you to acquire the necessary expertise to help an organization set up, manage and maintain an Occupational Health and Safety Management System (OHSMS). ) compliant with ISO 45001.

This training will give you in-depth knowledge of OHSMS best practices and enable you to apply them effectively to ensure a safe and healthy working environment for employees.

After mastering all the concepts related to OHSMS, you can take the exam and obtain the PECB Certified ISO 45001 Lead Implementer certification.

This certification will prove that you are able to implement ISO 45001 in an organization through your practical knowledge and professional skills.

### Who is this training for ?

#### For whom

- Managers or consultants involved in the management of health and safety at work
- Specialist advisors wishing to master the implementation of a health and safety management system at work
