Scrum Master

★ ★ ★ ★ ★

MPGP-93   2 Days (12 Hours)

Description

Agile methods are increasingly used in project management. SCRUM is the best known and most used. This training will give you the basic elements to put in place to ensure your role as Scrum Master and will allow you to prepare for the Professional Scrum Master1 certification. This training providing concrete exercises allows you to understand the steps and tools of an Agile approach (Scrum) and to correct it at the right times in the progress of your projects. It will allow you to play the role of guarantor during the project. It is recommended to take the exam within a maximum of 2 weeks to 1 month after the session.

Who is this training for ?

For whom

Project manager, project management, architect, developer, digital project manager, website or extranet manager and quality manager.

Prerequisites

Basic knowledge of project management and agile methods: reading the Scrum guide beforehand is a plus.

Good command of English is necessary (exam in English).
