

ISO 55001 Lead Implementer

QST-81 5 Days (35 Hours)

Description

This ISO 55001 Lead Implementer training will allow you to acquire the expertise necessary to support an organization during the establishment, implementation, management and maintenance of an Asset Management System (SMA) compliant with the ISO 55001 standard. This training is designed to provide you with a mastery of best practices in asset management systems and to develop your skills in improving the management of the organization's assets by allowing it to use its assets to their full potential.

Who is this training for ?

For whom

Managers or consultants involved in asset management. Specialized advisors wishing to master the implementation of an Asset Management System. Any person responsible for maintaining compliance with SMA requirements. Members of an ADM team.

Prerequisites

Good knowledge of the ISO 55001 standard and in-depth knowledge of implementation principles.

Training objectives

- Understand the correlation between the ISO 55001 standard and other standards and regulatory frameworks
- Master the concepts, approaches, methods and techniques necessary to effectively implement and manage an AMS
- Know how to interpret the requirements of the ISO 55001 standard in a specific context of the organization
- Know how to support an organization in the planning, implementation, management, monitoring and updating of the SMA
- Acquire the necessary expertise to advise an organization on the implementation of best practices relating to the Asset Management System
